# MISSION Statement

# P

Our mission is to advocate, empower, and support parents, teachers, and students with their interaction with exceptional children that have learning disabilities and disorders.

# VISION Statement

# T

We envision a community where exceptional children can live, play, and excel towards, becoming an intellectual part of society, through support of their community.

# "EVERY CHILD Can Learn"

# S

Studies have shown that there is an increasing number of children who are developing a wide spectrum of learning disabilities and disorders. As a community, we must work together and support each other for the success of these children. P.T.S. Support for Exceptional Children is a newly formed innovation that is designed to provide support along with empowerment to parents, teachers, and students. We believe that every child can learn in their own way. The inclusion of children with developmental delays and disorders and those that are not diagnosed can be challenging in the home and classroom. Without the basic training, skills, and support these challenges can be very difficult to overcome mentally and physically. This organizational support group wants to provide that support and tools needed to succeed. We believe that with providing support through meetings, workshops, training classes, and special events we can bridge the gap between exceptional children and their success.
